

# ALUMINIUM FLOOR BUNDING

AUSTRALIA'S BEST DRIVE-OVER FLOOR BUNDING SYSTEM

Product	Length	Width	Height
Aluminium Bunding	1200mmL	184mmW	30mmH
Installation Kit	4 concrete fasteners, 1 tube adhesive sealant		

HI-VIS POWDER COATING AVAILABLE

## APPLICATION EXAMPLES

- Industrial areas with heavy duty machinery
- High frequency traffic areas
- Class 3 Flammable liquid storage areas
- Warehouses, doorways and access points
- Wash bays

## FIRE RESISTANT

Aluminium Floor Bunding is a unique product ideal for flammable liquid containment in accordance with safety legislation AS 1940-2004:

“A spillage containment compound shall be sufficiently impervious to retain spillage and to enable recovery of any such spillage. The compound shall be chemically resistant and fire resistant as far as is necessary to fulfil its locations.”

Aluminium is non-magnetic and non-sparking, therefore suitable where explosive vapour mixtures are present.

## PERMANENT

Aluminium bunding will offer similar longevity to concrete bunds but at a fraction of the price. Install it once and it will protect your site for many years to come.

## TOUGH

This solid and robust bund, made from marine grade extruded aluminium, withstands frequent and heavy traffic over a long period of time. The aluminium bund is suitable for heavy vehicles such as Class 2 RAV B-Doubles and heavy duty container forklifts.

## PRACTICAL

The grooves provide traction as the vehicle passes over the low profile bund. The 30mm height provides bunding capacity while the profile maximizes clearance and allows easy tyre passage with minimal driver discomfort.

## STRAIGHTFORWARD INSTALLATION

The aluminium floor bunding is predrilled. Cutting is available at additional charge for mitre corners and custom lengths.
