

SpilMax® Oil & Fuel Marine Spill Kits are designed for response to on-water hydrocarbon spills. They are ideal to install visibly at foreshore works, on barges and in areas where boats are stored and refueled such as marinas and ports.

The absorbents in the Oil & Fuel Spill Kit are designed to absorb a wide variety of plant and seed oils, hydrocarbons, petrochemicals and petroleum-based solvents.

Since the Oil & Fuel absorbents are hydrophobic, they repel water and float even when fully saturated.

The large floating absorbent booms are contained in a mesh sleeve with snap hooks and nylon rope so booms can be joined and easily retrieved.

Spill kit instructions are on the outside of the bin for easy reference.

SPILL KIT	TOTAL WEIGHT	DIMENSIONS	REFILL
CHMW2	40kg	0.70mL x 0.60mW x 1.10mH	CHMW2-C

CH4521Y	240L Wheelie Bin (Yellow)		1
CH1726	SpilMax Absorbent Large Boom with clip - Oil & Fuel (3mL x 125mmDia)		4
CH1320	SpilMax® Absorbent Heavy Duty Pad - Oil & Fuel 400gsm (480mm x 430mm)		25
CH4752	SpilMax® Absorbent Wipe - Universal 200gsm (480mm x 430mm)		15
GNF	Nitrile Gloves (Pair)		2
CHWB	Contaminated Waste Disposal Bag & Tie		4
